Stop the Bleed

Bill Hilchey, Certified Instructor for the American

College of Surgeons Stop the Bleed program

Launched in October of 2015 by the White House, Stop the Bleed is a national awareness campaign and a call to action. No matter how rapid the arrival of professional emergency responders, bystanders will always be first on the scene. A person who is bleeding can die from blood loss within five minutes, so quickly stopping the bleeding is critical. Those nearest to someone with life threatening injuries are best positioned to provide immediate care if they are equipped with the appropriate training and resources. You'll learn the techniques and tools to use to save a life.
